

# YOUR DESKTOP

from anywhere, on any device.

# HOSTED DESKTOPS

## What is a hosted desktop?

A Hosted Desktop is a cloud computing solution that enables you to access your desktop on a wide range of devices, giving you the freedom to work from anywhere. It works just like the desktop on your office PC and is delivered to you in exactly the same way, with all of the benefits of a cloud based solution.

It looks, feels and behaves exactly the same.

## More benefits of switching to a hosted desktop solution

**Reduce your IT Costs** – No need for expensive hardware, servers and associated localised support. Free upgrades to the latest versions of MS Office.

**IT Support** – Reduce your on premise support requirements. Hosted Desktops are managed and supported for you.

**Save on energy bills and reduce your carbon footprint** – Less physical hardware on premise resulting in lower energy costs.

**Business Continuity/Disaster Recovery** – Your Hosted Desktop environment is backed up and replicated.

**Your Data is in safe hands** – Your environment is managed by an ISO 27001:2013 accredited company within a secure environment.

### YOUR DATA IS SAFE & SECURE

All of your data is fully secured using industry standard SSL encryption, commonly used for online banking and secure transactions.

### WE'VE GOT YOU BACKED UP

Regular backups to the cloud ensures that your business can operate as normal in the event of a disaster.
